2012 was best-ever for Swede volleyball

The Swedes rewrote the record book for Gothenburg volleyball this fall, recording the most wins in school history as well as marking 36 new spots in the all-time Top 10 with four school records.

“We were fortunate to have really good chemistry this year,” said coach Mary Clark. “There has to be that connection with volleyball.”

There also has to be a positive, winning attitude.

“It didn’t just happen overnight,” Clark said. “We had to work on taking the court expecting to win every game and we reinforced all the time that the girls had to focus on their game and do what they could do on their side of the net.”

Although each varsity player improved her physical play with every practice and every game, Clark said the real progress came in the critical mental aspects of the game.

“There are no second chances in volleyball,” the coach said. “You don’t get to rebound and shoot again. You only get one try. And all parts of the team have to do their job every time or things just don’t work.”
